

take&drive

Public transport and shared vehicles in one app

How to move around Poznań?

Public transport: buses, trams

City bikes

E-scooters

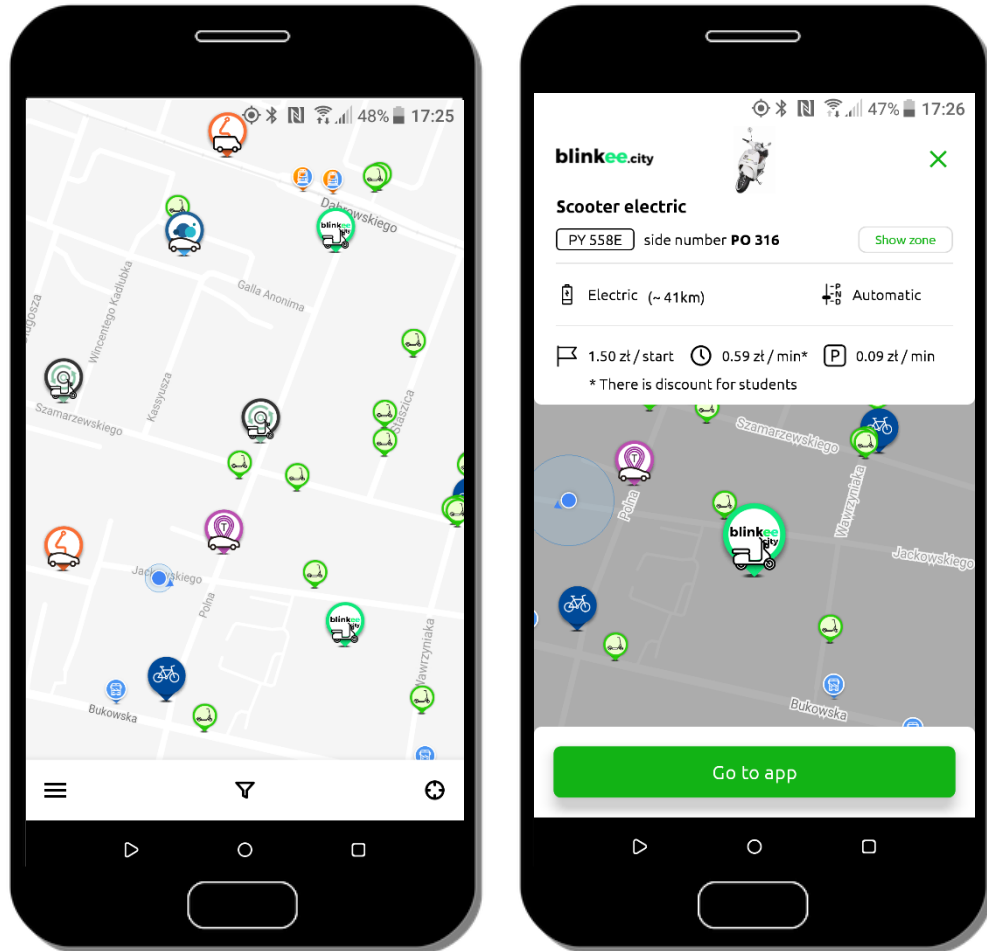

Carsharing

Scooters

Take&drive shows you all mobility options

We show shared vehicles (from all providers) - cars, mopeds, e-scooters* and bicycles on one map.

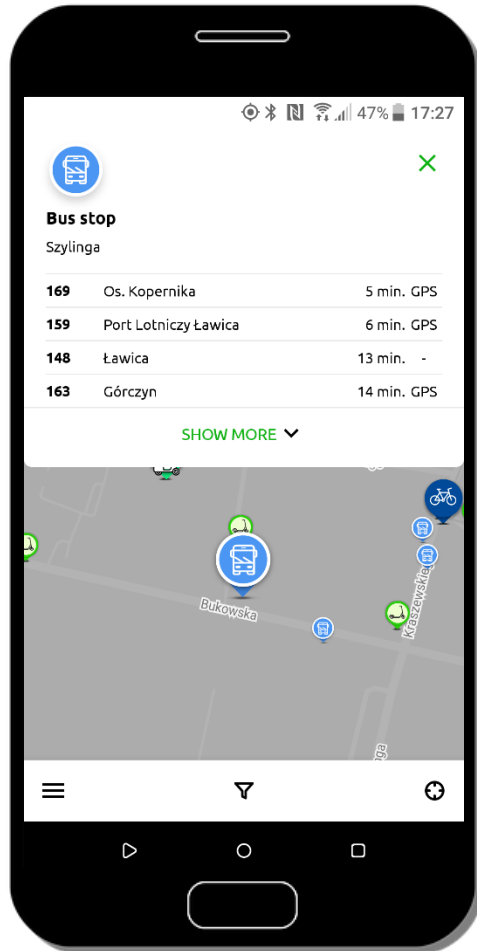

We present the most important information about the vehicle (eg. price, zone).

If you want to rent a vehicle you can go directly to the provider's app.

In the future users will be able to rent a vehicle directly via take&drive, without registration in provider's app.

* Bird's e-scooters will be integrated with take&drive soon.

With take&drive travelling by public transport is easier

We present bus / tram stops and **real time arrivals of buses and trams** (based on GPS data).

If your bus is late you can always check if there is an e-scooter nearby (or other shared vehicle).
