

Adam Kubas is a graduate of the Faculty of Chemistry, Adam Mickiewicz University in Poznan, Poland, where he obtained an MSc in 2009. He received his PhD in 2012 from the Karlsruhe Institute of Technology, Germany, under the supervision of PD Dr Karin Fink. In 2012–2014 he was a post-doctoral researcher with Prof. Jochen Blumberger at the University College London, UK. Afterward, he received a Max-Planck-Institute Fellowship for 2014-2016 to carry out research at the MPI for Chemical Energy Conversion in Mülheim/Ruhr, Germany. He was appointed an assistant professor at the Institute of Physical Chemistry, Polish Academy of Sciences, in 2016. After earning his DSc (habilitation) in 2019, he was promoted to associate professor at IPC PAS. In 2020, he became the leader of the "Cooperative Catalysis" group. He also serves as the Institute's deputy director for scientific affairs. He is passionate about work at the interface of theory and experiment. His particular research interests focus on applying and developing quantum-chemical methods for the growing field of cooperative catalysis.
