

## Wykłady specjalistyczne-nauki chemiczne 23/24

### 1. *Surfactants and colloids in nanomedicine and nanotechnology* (10h)

Prof. Eduardo Marques (Uniwersytet w Porto)

14-16 listopada 2023 r. **sala 2.57**

1. Surfactants and colloids: fundamentals aspects (2h) - 14th November 10-12h; 14-16 h
2. Applications in nanotechnology and industry (2h) - 15th November 14-16 h
3. Applications in nanomedicine (2h) - 15th November 14-16h
4. Evaluation (oral presentations - 2h) - 16th November 10-12h

### 2. *Chemical Processes for Energy Store and Transformation* (10h)

Prof. Cristina Maria García Yebra (Uniwersytet w Alcalá, Hiszpania)

6-10 maja 2024 r.

### 3. *Modern Synthesis of Some Representative Pharmaceuticals – Retrosynthesis* (15h)

Prof. Loránd Kiss (Institute of Organic Chemistry, Research Center for Natural Sciences, Węgry)

Semester letni

### 4. *Metal-metal bond in coordination and organometallic compounds* (10h)

Dr. Santiago Herrero Domínguez (Uniwersytet Complutense, Madryt)

18-21 kwietnia 2024

Semester letni

### 5. Dr. Margaret E. Kerr, Dr. Meghna Dilip

Worcester State University (USA)

*Green Chemistry and the U.N. Sustainable Development Goals: Harnessing Their Combined Power* (12h)

Kurs w formie hybrydowej - kwiecień/maj
